

**From the makers of Chasing Ice comes
Chasing Coral**

An epic adventure about a team of divers, photographers, and scientists on a thrilling expedition to coral reefs around the world to capture our changing oceans.

Join us for the Tallahassee premiere of this stunning and thought provoking film

August 10th, 7 - 9 p.m. at the Challenger Learning Center!
Free, Doors Open at 6:30 (Donations accepted)

Sponsored by Big Bend Sierra Club, ReThink Energy Florida, Apalachee Audubon, Citizens Climate Lobby & Surfrider Foundation

After the film there will be a 20 minute question and answer session with Dr. Sandra Brooke, a coral researcher with FSU Coastal and Marine Lab and Budd Titlow, professional wetland scientist and wildlife biologist, author and photographer.

Coral reefs around the world are vanishing at an unprecedented rate. The team set out on an ocean adventure to discover why and to reveal the underwater mystery to the world. The imagery is an ominous warning of the planet's future along the current course; at the same time, it is a celebration of the most biodiverse ecosystem on the planet.

CHASING CORAL was directed by Jeff Orlowski and produced by Larissa Rhodes, as an Exposure Labs production. The film team trained their lens on the world's oceans on a journey to reveal a mysterious phenomenon happening beneath the surface. See the official trailer at <http://www.chasingcoral.com/>
